DETAILED ACTION

Claim Objections

Claims 1-16 are objected to because of the following informalities: there is no period at the end of claim 1. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17, 20-24, 28, 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Kwak. Applicant claims in claim 28 a bladder with a housing that has a port. Kwak shows in Fig 3 a bladder with a housing (30, 31) that has a port.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13, 16, 18-19, 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kwak in view of DeMars. Kwak shows the claimed shaver with a handle with a cavity and an upper housing with outlets near the blade. Kwak may not show a cartridge. Cartridges are notoriously old in the art and one is shown by DeMars. The advantage is that they can provide a plural blade device that is easily replaceable.

Art Unit: 3724

Obviously one of ordinary skill in the art provide such a cartridge with the device of Kwak to increase the shaving effectiveness and convenience of operation. Regarding claim 16 note that DeMars shows a curved actuator contact surface.

Allowable Subject Matter

Claims 14-15, 25-26, 29-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
